Art Unit: 1761

1. The disclosure is objected to because of the following informalities: In the Preliminary Amendment submitted with this application, applicant mentions parent SN 09/371,318 on page 1 of the spec. However, the current status of this parent has been omitted. Applicant is requested to update this status.

Appropriate correction is required.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 9 and 19 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Eden et al (4,874,628, col. 6, lines 45-50 and col. 8, lines 50-65.

Applicant is referred to paragraph no. 3, Paper No. 070604.

5. Claims 10-15 and 20-25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Eden et al.

Applicant's referred to paragraph no. 4, Paper No. 070604.

6. Claims 16, 17, 26 and 27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Eden et al in view of Jeffcoat et al, Park or Yuan.

Applicant is referred to the reasoning set forth in paragraph no. 5, Paper No. 070604.

7. Applicant's arguments filed December 3, 2004 have been fully considered but they are not persuasive. Although Eden et al discloses a variety of converted starches, as applicant recognizes, the fact remains that one of these starches is sago starch (col. 6), as claimed by applicant. This disclosure, in conjunction with Eden et al's disclosure that each starch used therein can have a water fluidity ranging from 10-75 (col. 8), is enough to anticipate applicant's invention, as claimed by applicant in claim 9 and 19.

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
